

Converged Connectivity Consulting

APTelecom specializes in developing connectivity and digital infrastructure in both established and emerging markets around the globe

We pride ourselves on a history of delivering qualified pre-sales to planned subsea system builds and terrestrial networks

Data Center Services

Determine the best direction to host IT services: in the cloud, in a co-location data center, or with a managed service provider

Due Diligence

A consulting partner to the private equity market providing comprehensive analysis that ensures maximum value is realized from every deal

Emerging Markets

We are leading Emerging Markets experts having been a focus of the business since 2009

Satellite

Market and business analysis, strategy, development and planning

Serving the Industry

SINCE 2009

With 50 years combined experience in the submarine cable industry, APTelecom prides itself on superior customer service and the capability of delivering qualified pre-sales to any system looking to seek funding or expansion.
